### **Technologies:**

Angular

CSS and SCSS

Bootstrap

Json

### **App Components:**

Header

Questions

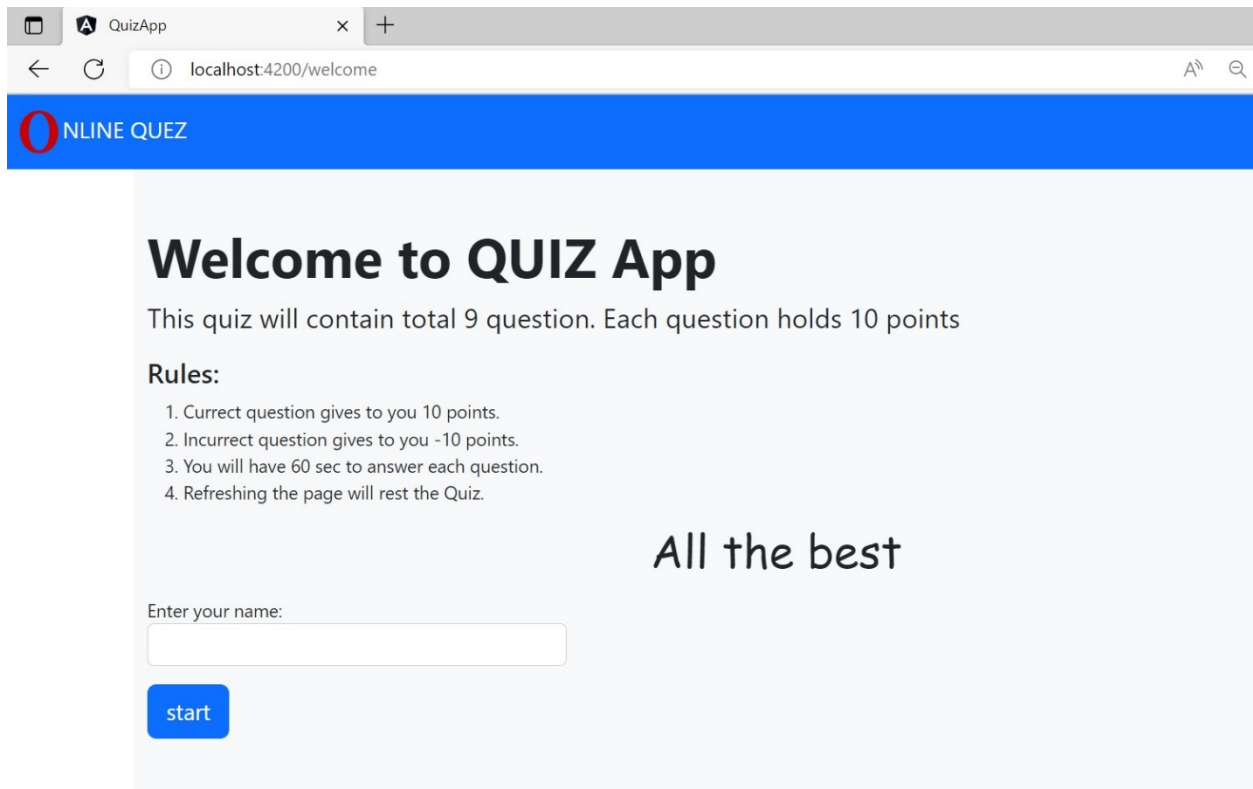

Welcome

Service

### **Spring Process:**

- Providing Header component to design the main page.
- Implementing Welcome component to design home page.
- Implementing Question component to design important details for Online Test Application such as: name of user, points, timer, show questions, incorrect and correct answers and etc.
- Implementing Service component to get questions in JSON format.
- Designing result page to show test result to user.
